

Bespoke frame bag ordering instructions

1. Have a good look at your bike and the way you use it, decide what you wants/needs might be and, if you are uncertain about anything, give us a call or drop us an e-mail. By spending a little bit of time deliberating just what you might need, you won't be left wanting later on.
2. Order the bag! Go online and choose your perfect combination of options.
3. Measure your frame. Grab a bit of rigid cardboard and secure it to your frame or have a friend handy to hold it for you. Now draw around the inside of your frame getting as close as possible to the tubes and corners that the bag will be fitting into.

4. Cut out your drawing and pop it back into your frame. Make sure it fits snugly and that any damaging obstructions (like chainrings!) will be avoided when the final width is taken into account.

5. Write your name and address **on** the cardboard cut-out. Also include any contact information such as your phone number and e-mail address. Wrap up your template and send it to:

Aiguille Alpine Equipment
 Staveley Mill Yard
 Staveley
 Kendal
 Cumbria
 LA8 9LR

Once we've received both your online order as well as your cardboard template through the post, we can start making your creation. We aim to get your order out to you within three weeks, but in busy periods this might take longer.
